**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-21 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the functional recitation following "expansion means" namely, "for engaging the first transmitting means and the second transmitting means.....and for disengaging from the first transmitting means and the second transmitting means after the distraction is complete" renders the claim vague and indefinite since multiple functions are recited as a run-on sentence and it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-21 and 24-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Landsberger (US 6,113,599).

Landsberger discloses a distraction device including: a first anchor plate or first transmitting means 151 made of bioresorbable material, the first anchor plate having

structure for attachment to bone, i.e, fingers; a second anchor plate or second transmitting means 152 made of bioresorbable material, the second anchor plate having structure for attachment to bone, i.e., fingers; an expansion means not integral with the first and second plates; a clutch or screw actuated expansion mechanism (161, 162); and bioresorbable screws 153, 154 for attaching the plates to bone (Fig. 2, col. 10, lines 50-67, col. 11 and col. 12, lines 1-27).

The method steps of claims 25-28 are inherently performed when the Landsberger device is used for tissue distraction.

### ***Response to Arguments***

Applicant's arguments submitted under "REMARKS" in the response filed on February 28, 2008 have been fully considered but are not found to be persuasive for the following reasons.

Landsberger clearly discloses that the expansion means is removed from the body following distraction and consolidation of bone (col. 17, lines 29-51). Thus, it is the Examiner's position that the telescopic drive shafts are configured to be disengaged after distraction is complete. The Examiner also notes that a claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus" if the prior art apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987).

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
